F1 CONTINENTAL

"I actually designed my surgery around the Fimet F1 Continental to take full advantage of the whip arm delivery system. The nurses love it as do the patients who comment on the sleek lines and the modern styling. To get so many unique features at a very reasonable price it was not a difficult decision to purchase a Fimet F1"

Dr Nick France, Rowville, VIC

F1 EQUIPMENT models are available in electric (E) or pneumatic versions(A).

F1 HYGIENE CONCEPT: smooth, cleanable surfaces combined with plenty of removable, disinfectable parts like arm and elbow rests, opal bowl and instrument hoses, headrest, seat and suction hoses.

F1 HANDS FREE: F1 cordless, remote footcontrol commands simultaneously the chair and unit thus decreasing the cross infection effect.

F1 EVASEPT: a system to disinfect the suction system.

F1 SEPTISPRAY: a system to disinfect the unit's water hoses.

F1 STERIFLOW or STERIPUMP: a valve or pump to dispense the isotonic liquid for surgery.

F1 CLEANWATER: the choice to select sterilised or house water.

F1 UPHOLSTERIES: anti-bacterially treated surfaces of CLASSIC and SOFT upholsteries and the extremely durable, totally seamless ULTRACLEAN material .

F1 PRIME

"I bought my first F1 Fimet unit in 1995 and then later a F1 PRIME in 1999, Both have proven their reliability in every day use, they are clean and easy to maintain. I particularly like the "Whip Arm" set up with the curing light and the scaler at hand. The staff appreciate the ease of cleaning and maintenance and and its modern design appeals to patients."

Dr Richard Slattery, Kinross, WA

F1 SEPTICOVER : autoclavable silicon cover on instrument and suction heads for improved hygiene and durability of touch buttons.

F1 CONTROL SYSTEMS: in electric models (F1 E) most unit and chair functions can be conveniently used by the unique, cordless remote footcontrol.

-Selection of spray-mode. Water, air, spray or dry.

-Selection of micromotors minimum from 100 rpm up to 40,000, 20,000 or 10,000. Stepless left-right, display, security auto-block. Chip-blower.

-Automatic and manual movements of the chair with 2X4 programmable memory positions and last position memory.

Pneumatic models (F1A) are controlled:

-by disc-type footcontrol for unit's air, water and spray functions and

-by single or double joy-sticks on the chair's base with the same chair control features as the remote footcontrol.

In addition, a cordless remote handcontrol is available for the chair.

F1 SPECTRA LIGHT with an easy-to-clean arm, long enough for lower jaw, double bulb and near to none curing effect. Hygienic sensor or unit control.

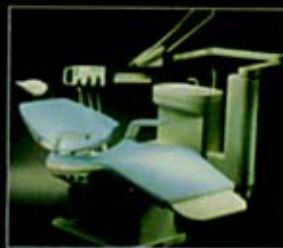

F1 HANDY

F1 HANDY: The set is popular among orthodontists and hygienists. The pneumatic (or E-option) doctor's module with the arm in the middle of the chair can be adjusted to any position from left to right.

F1 VISION LIGHT: Classical reflector style, 12V-50W halogen bulb, up to 25,000 Lux and 4500° K and 10X20 cm shadowless, light pattern.

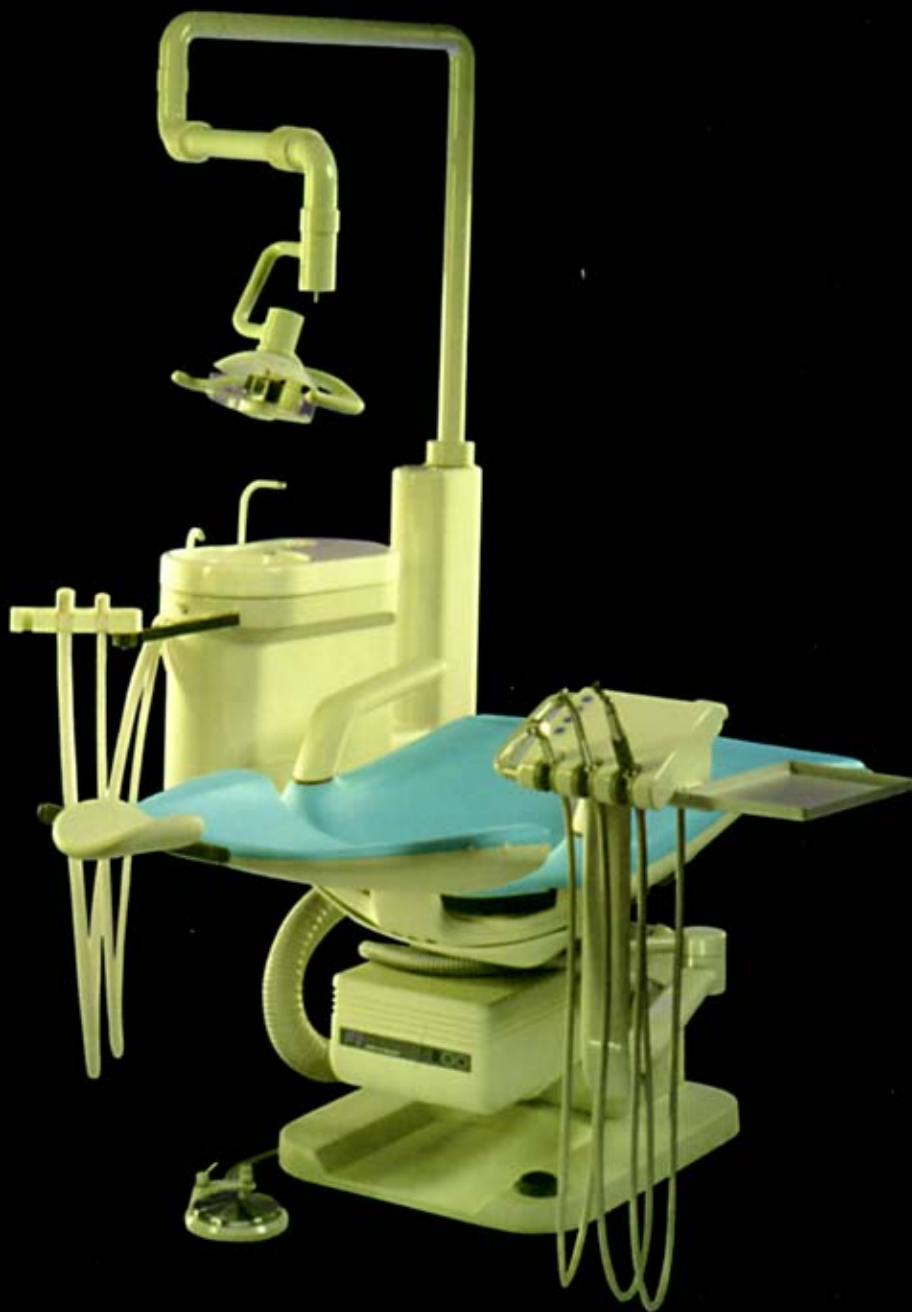

F1 CART: Ideal to be placed anywhere around the chair or to be parked under the cabinetry. Adjustable height. Good help for renewals.

"I have been using the Fimet for about 7 years and it is still as good as new. I am particularly impressed by the counter balance of the "Whip-Arm"; there is no drag on the hand pieces at all. I am very happy to recommend the Fimet for it's ease of use; style and reliability."

Dr Bruce Harris, Aspley, QLD

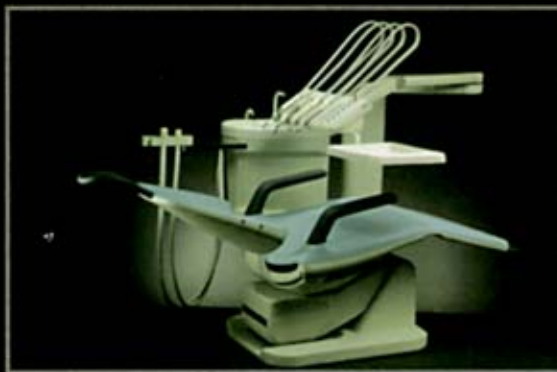

F1 CITY

EQUIPMENT F1 CITY: a set up with a suction module placed into the cabinetry and the unit without cuspidor and suction for improved hygiene.

The 200° rotation of the F1 chair is an excellent feature to take advantage of the cabinetry for easy reach of small devices, suction, PC etc..

"I have had the F1 Fimet unit for nearly 7 years, its streamline design looks impressive and makes cleaning very easy. The chair is very adaptable and patients frequently comment on how comfortable it is. Having used F1 fimet I would find it very difficult going back to a conventional dental unit."

Dr Ian Renton, Paddington, QLD

EQUIPMENT F1 S: a heavy duty package, pneumatic system (E-motor option) with a conventional suction arm and an extremely durable F1 Ultraclean chair. For all whip arm versions there are 2 lengths of unit arms available.

F1 TRADITIONAL

EQUIPMENT F1 TRADITIONAL: with removable hanging hoses. Unit standard colour RAL 9002 gay white.

F1 JOY-STICK CONTROL

F1 E DOCTOR'S MODULE:

F1 DENTAL CHAIR CLASSIC

- see next page.

F1 CART LIC

F1 CART TRADITIONAL LIC: with its wide tray table and easy mobility it is popular in surgery. Very useful for renewals. Available with F1 standard floorbox or box on base (BOB CART), and as an independently working (SOVEREIGN) version with cordless foot control.

F1 DENTAL CHAIRS

3 Models with different upholsteries, in different colours, base in white or gray or in their combination.

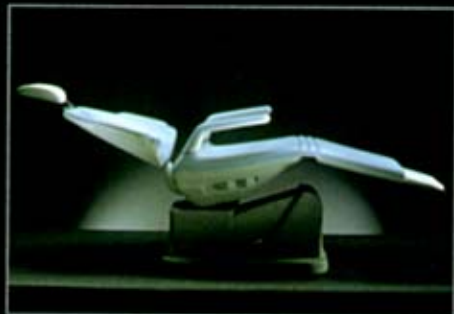

F1 ULTRACLEAN: extremely durable and easy to clean flexible composite material with sleek lines. Rotating, removable armrests and elbow supports, selection of headrest.

F1 SOFT: as **ULTRACLEAN** but with comfortable upholstery made in sky leather.

F1 CLASSIC : as **SOFT** but wider backrest and longer legrest.

Functions, mechanics and options are the same:

- 2X4 programs, last position memory.
- cordless foot, hand, 1-2 joysticks or unit touch pad control.
- Swivel of chair 200°, seat lift 50cm, back and leg 0-90°.
- Synchronised leg rest movement.
- Adjustable seat angle upto Trendelenburg.
- Self diagnostic, total low voltage.
- Height adjustable back rest.

"I have had a Fimet F1 unit for at least 9 years. The simple layout with clean, good looking features appeals to me and I like the infection control. The cordless remote foot pedal controls a lot of the features and frees the hands to work on the patient."

Dr Joseph Da Cruz, Queanbeyan, NSW

FIMET is one of the globally operating manufacturers of dental equipment. Through its comprehensive range of F1 equipment, adapted for different markets and needs, FIMET has developed an international reputation.

FIMET was established in 1981. Today the group employs 120 persons internationally. With its main factory in Finland, FIMET distributes its products in 50 countries, through a network of professional distributors, offering up to date technical and customer service.

Globally there are more than 20,000 patient chairs, 10,000 dental delivery units and 2,000 x-ray sensors in service. FIMET products are CE certified, according to the highest European standards and FIMET, as a company, is certified according to the ISO-9001 quality system.

Awarded by 3 prestigious product design awards, nominated as the Finnish "export locomotive" and as one of the top job-creating companies in Europe, FIMET aims to satisfy its customers with good quality, optimal information, a wide selection of products and options as well as top-service.
